Invitation to the international expert workshop at the E-Mobility-Day in Lower Austria, Melk.

Beside of presentations of international e-mobility experts participants have the opportunity to test a wide range of e-vehicles at one of Europe's biggest e-mobility-test-events

The **E-Mobility-Day** starts at 9 am. In the morning international experts will present key notes. Between 10 am and 5 pm more than 50 e-cars (from Tesla to e-Golf), 150 e-bikes, e-motor cycles, e-scooters and other e-vehicles can be tested for free.

We really hope that participants from many European regions will take part in the event.

You are also very welcome to distribute the information on the event among your colleagues and collaborating partners interested in e-mobility.

We are looking forward to meeting you again or for the first time at the next meeting in Melk an der Donau. Thank you in advance for your interest!
